

Strategic Campaign Recommendations Report

Riverside University Foundation — Q4 2026 Action Plan

Campaign Snapshot

Metric	Value
Campaign Goal	\$343.8M
Raised to Date	\$633.2M
Open Pipeline	\$164.1M
Forecasted Total	\$1.46B
Monte Carlo P50 (Expected)	\$691.1M
Probability of Reaching Goal	100%

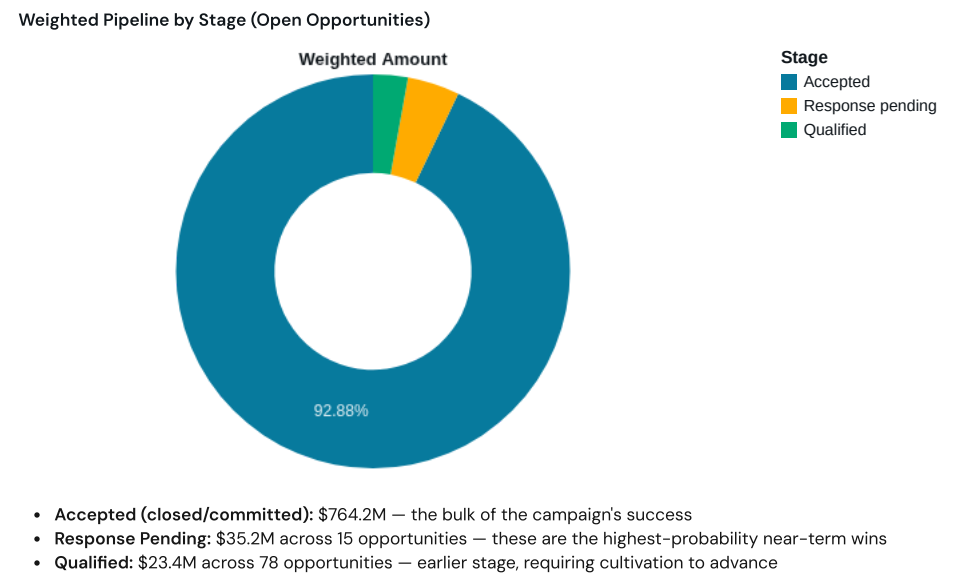

The campaign has already surpassed its \$343.8M goal by \$289.4M, with \$633.2M raised. The Monte Carlo simulation (10,000 iterations) confirms a **100% probability** of meeting the overall goal, with the expected outcome at **\$691.1M** (P50) and an optimistic scenario reaching **\$722.9M** (P90).

However, this headline success masks significant **designation-level imbalances**: 11 of 28 designations are currently forecasted to fall short of their individual goals, representing a combined **\$22.4M shortfall** with only **\$2.0M in weighted pipeline** to cover it — leaving a **\$20.4M unfunded gap**.

Risk Assessment: Concentration & Pipeline Health

Pipeline concentration is dangerously high. The top 10 opportunities account for **84.7%** of the entire open pipeline. Additionally, **24 of 93 open opportunities (26%)** are missing expected ask dates, making forecasting unreliable for a quarter of the pipeline.

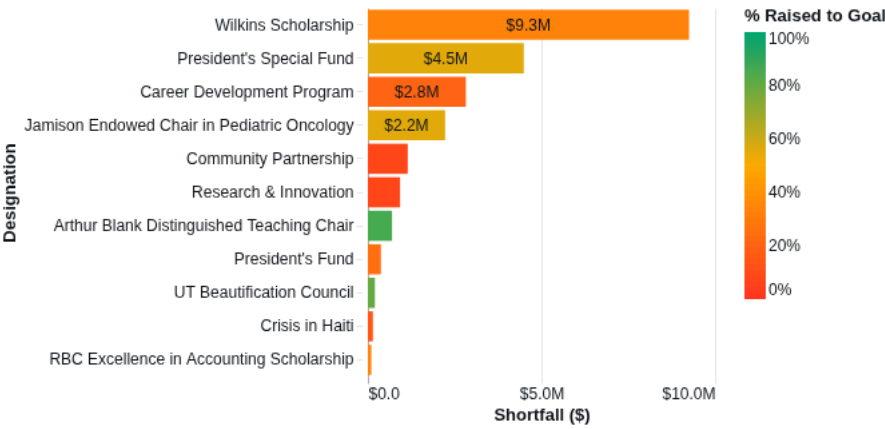

The weighted pipeline breaks down by stage as follows:

Priority 1: Close the 11 Lagging Designation Gaps

These designations are forecasted to miss their goals. Ranked by dollar shortfall:

Designation Shortfall to Goal (11 Lagging Designations)

	1.1 designation_name	1.2 goal_amount	1.2 raised_amount	1.2 open_pipeline
1	Wilkins Scholarship	15,000,000	5,000,000	
2	President's Special Fund	10,000,000	5,508,163	
3	Career Development Program	5,000,000	1,002,000	
4	Jamison Endowed Chair in Pediatric Oncol...	5,000,000	2,775,000	
5	Community Partnership	1,300,000	101,000	
6	Research & Innovation	1,000,000	73,065	
7	Arthur Blank Distinguished Teaching Chair	5,000,000	4,304,000	
8	President's Fund	500,000	125,235	
9	UT Beautification Council	1,000,000	796,521	

Show generated code

Highest-impact designations requiring immediate attention:

- 1. **Wilkins Scholarship** — \$9.25M shortfall (only 33.3% to goal). Has \$750K in weighted pipeline but needs \$9.25M more. This is the single largest gap and should be the top fundraising priority.
- 2. **President's Special Fund** — \$4.49M shortfall (55.1% to goal). Zero pipeline and zero weighted forecast beyond what's raised. Needs entirely new prospect identification.
- 3. **Career Development Program** — \$2.82M shortfall (20.0% to goal). Has \$1.175M in weighted pipeline, but still needs \$1.65M in new commitments.
- 4. **Jamison Endowed Chair in Pediatric Oncology** — \$2.23M shortfall (55.5% to goal). Zero pipeline — requires targeted major gift solicitation from healthcare-aligned donors.
- 5. **Community Partnership** — \$1.15M shortfall (7.8% to goal). Only \$50K in weighted pipeline. Critically under-resourced relative to its \$1.3M goal.
- 6. **Research & Innovation** — \$927K shortfall (7.3% to goal). The lowest attainment rate of any designation. Zero pipeline.

Priority 2: Accelerate High-Value Open Opportunities

The 10 largest open opportunities represent **\$139.3M in ask value** and **\$51.9M in weighted expected value**. Advancing even a few of these would materially improve designation coverage.

Rank	Stage	Ask Amount	Win Prob.	Weighted Value
1	Qualified	\$25.0M	25%	\$6.25M
2	Response Pending	\$20.0M	50%	\$10.0M
3	Qualified	\$20.0M	25%	\$5.0M
4	Qualified	\$20.0M	25%	\$5.0M
5	Response Pending	\$18.0M	50%	\$9.0M
6	Response Pending	\$12.0M	50%	\$6.0M
7	Response Pending	\$7.5M	50%	\$3.75M
8	Response Pending	\$7.0M	50%	\$3.5M

9	Qualified	\$6.0M	25%	\$1.5M
10	Qualified	\$3.5M	25%	\$875K

Key actions:

- The **5 Response Pending opportunities** (\$64.5M total ask, \$32.25M weighted) are the closest to closing. Leadership should prioritize follow-up on these asks immediately.
- The **\$25M Qualified opportunity** is the single largest in the pipeline. Moving it to Response Pending would increase its weighted value from \$6.25M to \$12.5M.
- The what-if scenario analysis shows that **improving conversion rates by 15 points** would lift the forecast by \$24.6M (from \$822.8M to \$847.4M), making it the highest-leverage operational improvement.

Priority 3: Solicit Top Major-Gift Prospects (RFM-Ranked)

The RFM model identifies 25 major-gift prospects with suggested asks of **\$10M or more**, representing over **\$4.3B in potential solicitations**. The most actionable prospects — combining high capacity, strong engagement history, and recent activity — are:

Tier 1: Immediate Solicitation (RFM 15, Recent Engagement)

Prospect	Lifetime Giving	Largest Gift	RFM	Recency	Suggested Ask
Rita C. Daley	\$11.0M	\$7.5M	15	96 days	\$11.3M
Bernie J. Grad	\$17.3M	\$10.0M	15	148 days	\$15.0M
Robert Hernandez	\$64.5M	\$25.0M	15	156 days	\$37.5M
Alphabet, Inc.	\$28.7M	\$20.0M	15	157 days	\$30.0M
Midwest Energy, Inc.	\$125.0M	\$125.0M	15	497 days	\$187.5M
Thomas Keating	\$26.1M	\$13.0M	15	584 days	\$19.5M
Albert Gator	\$20.2M	\$20.0M	15	699 days	\$30.0M

These 7 prospects have the highest RFM scores (15) and the most recent engagement. Combined suggested asks total **\$330.3M**.

Tier 2: Re-engagement Required (High Capacity, Lapsed)

Prospect	Lifetime Giving	Largest Gift	RFM	Recency	Suggested Ask
Troy N. Lewis	\$2.0B	\$2.0B	14	1,784 days	\$2.93B
John P. Morgridge	\$62.5M	\$31.0M	14	738 days	\$45.5M
Milton Stapler	\$50.0M	\$20.0M	14	1,747 days	\$29.3M
Helen M. Asher	\$200.0M	\$200.0M	13	4,675 days	\$286.7M
Frank J. Guarini	\$22.0M	\$20.0M	13	3,096 days	\$28.7M

These donors have extraordinary capacity but have not engaged recently. A structured re-engagement campaign — personal outreach from the president or board chair — could unlock transformational gifts.

What-If Scenario Analysis

The scenario modeling shows the relative impact of different strategic levers:

Scenario	Forecast	Δ vs. Current
Current trajectory	\$822.8M	—

Improved conversion (+15 pts)	\$847.4M	+\$24.6M
More pipeline (+20% open)	\$834.5M	+\$11.7M
Campaign extension (recover 10% lapsed)	\$822.9M	+\$92K
Major donor delays (-25% qualified)	\$817.0M	-\$5.9M

Improving conversion rates delivers 2× the impact of growing pipeline volume. This reinforces the recommendation to focus on advancing existing Response Pending and Qualified opportunities rather than solely building new pipeline.

Summary of Recommendations (Ranked by Expected Dollar Impact)

Rank	Action	Target	Expected Impact
1	Solicit	Midwest Energy, Inc. (RFM 15, 497d recency)	\$187.5M
2	Solicit	Robert Hernandez (RFM 15, 156d recency)	\$37.5M
3	Solicit	Alphabet, Inc. (RFM 15, 157d recency)	\$30.0M
4	Solicit	Albert Gator (RFM 15, 699d recency)	\$30.0M
5	Improve conversion	All Response Pending opps (+15 pts)	\$24.6M
6	Solicit	Thomas Keating (RFM 15, 584d recency)	\$19.5M
7	Solicit	Bernie J. Grad (RFM 15, 148d recency)	\$15.0M
8	Solicit	Rita C. Daley (RFM 15, 96d recency)	\$11.3M
9	Accelerate	\$20M Response Pending opp (50% prob)	\$10.0M
10	Close gap	Wilkins Scholarship (\$9.25M shortfall)	\$9.25M
11	Accelerate	\$18M Response Pending opp (50% prob)	\$9.0M
12	Advance	\$25M Qualified opp to Response Pending	\$6.25M
13	Close gap	President's Special Fund (\$4.49M shortfall)	\$4.49M
14	Close gap	Career Development Program (\$2.82M shortfall)	\$2.82M
15	Close gap	Jamison Endowed Chair (\$2.23M shortfall)	\$2.23M

Data Sources

This report was generated from the Blackbaud CRM data integrated into Databricks, using the following analytical tables:

- blackbaud_demo_bbcon.default.exec_summary — Campaign-level KPIs

- `blackbaud_demo_bbcon.default.designation_performance` — Designation goal attainment
- `blackbaud_demo_bbcon.default.opp_enriched` — Open opportunity detail with win probability
- `blackbaud_demo_bbcon.default.prospect_next_best_ask` — RFM-scored prospect solicitation list
- `blackbaud_demo_bbcon.default.montecarlo_forecast` — 10,000-simulation Monte Carlo forecast
- `blackbaud_demo_bbcon.default.pipeline_risk` — Concentration risk metrics
- `blackbaud_demo_bbcon.default.scenario_forecast` — What-if scenario modeling
